

## CHERYL

Hi, my name is Cheryl and early 2020 was when I caught Covid before anybody knew what Covid was and I really thought I was going to die off but I didn't. We made it through we went into quarantine. I posted on my Facebook page glibly the last pandemic Einstein discovered the theory of relativity. What are we going to do? We thought it would just last a couple of weeks or a couple of months or something like that. And then here we are two years later still fighting through all of it. I'm an interior designer. So a lot has changed in my work life is terrible supply chain issues. And if I can't get hold of a client or a rep for some of my products, I honestly have to assume maybe they died since you're not answering my phone calls. There's so much loss. Lots of personal loss and my business but what I did find out is that my family and I survived we stayed alive. I watched a lot of Netflix, Hulu, all of that. I specialized in European history. I started watching the Vikings and what strikes me about the Vikings is they are fearless they fight and they they do anything but they don't have any fear and the reason they're so good at what they do and discovering new worlds and taking what they want is because they don't give up and they're not afraid to die. And that's what I realized. I had happened to me. I'm not afraid to die. I know I'm going to get through it. It's going to be a different world than I had before but I can move through it and I can press because like the Vikings I'm not afraid to die anymore. I'm a Survivor. We made it through we made it through 2018. We made it through 2022. It's going to be okay. I know it's going to be okay because we're like the Vikings were going to keep fighting until we get it and we're not afraid to die.
